## Infant and Toddler Program

Premier School's Infant and Toddler rooms provide your child with a warm and nurturing environment. Our classrooms are child-centered and designed to stimulate creative exploration and support discovery through meaningful, real-life experiences.

Adult-child interactions are essential to early brain development. The closeness of sharing, during free exploratory play, is fundamental to stimulating and developing the pathways of the brain that produce cognitive and social-linguistic knowledge. Infant and Toddler teachers encourage the building of complex neural circuits that govern motor development, language, math, music, logic, emotional and social skills by engaging in interactions with children during normal periods of the day. Teachers use feeding and diapering times to ask open-ended questions, use pretend and parallel talk, repeat time and space words, and encourage the child's actions and accomplishments.

Teachers will use developmental guidelines to determine, in conjunction with you, appropriate times for advancing to another classroom. Every effort is made to ensure smooth transitions and times for "visiting" are scheduled prior to final placement.

Premier School has an open-door policy. Parents are welcome to visit at any time and we offer Internet camera viewing, for those times when you would like to "peek" in and see how your child is doing.

Our program is designed to provide you and your child with a "home away from home."
