## **Occupational Therapy**

Dear Parents,

We have some exciting news about new opportunities within our Preschool. Beginning Monday December 14, 2009, Patricia DeShazo will be joining our staff as our Occupational Therapist. We would like to extend to all of our parents the opportunity to have their children work with her. This is a new experience for Premier Collaborations and we are thrilled to be able to offer you this service through our school.

Occupational therapists strive to increase life skills including work related activities to leisure activities. Occupational therapists work with individuals to facilitate health and well-being through engagement or re-engagement in occupation. Occupational therapists are becoming increasingly involved in addressing the impact of occupational deprivation. Additionally, Patricia DeShazo will be working on fine motor skills including handwriting. Each child will receive an individual plan that will work on increasing motor skills specific child's needs.

If you are interested in more information or taking advantage of these availabilities please contact Leslie Buchanan or Carol Vancil at Premier Collaborations CDC at 256-464-8405.

Thanks,

Behavioral Support Staff
